3M™ Multi-Touch Technology PCT2000PX
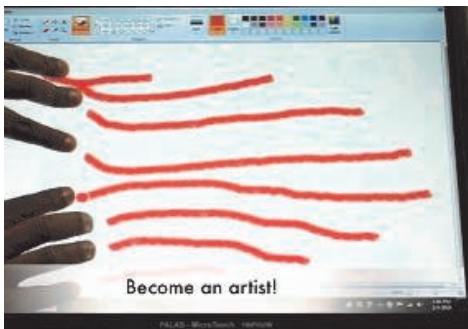

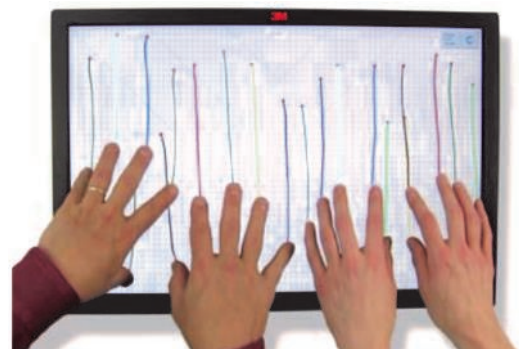

PALAS
ISO 9001:2008 Certified

3M Multi-touch Technology, based on 3M Projected Capacitive touch technology and electronics, offers fast, accurate and simultaneous 20-finger touch functionality.

3M Multi-touch Technology is compatible with Windows 8, 7 , XP, Vista and Linux to support gesture actions like flick, pinch and expand, and image rotation. Developers can use these cues to create complex, multi-finger, multi-user applications. 3M has Windows Touch Additional Qualification (AQ) for multi-touch interactivity. Sizes from 17" to 46".
- **20 finger input up to 27"**
- **40 finger input for 27" and bigger**
- fast 6 millisecond touch response
- Enables the next-generation of interactive software applications well beyond two touch expectations
- Robust hardware platform that can help "future proof" software development
- Compatible with Windows 8, 7, Linux
- Anti-friction surface enhances the user experience
- Palm rejection
- Over 3300 touch sensing points for optimal precision
- Glass front surface for high durability
- Works with light touch and with gloves
- Ultra-fast response time
- <u>**Not affected by surface contaminants such as dirt, grease, liquids**</u>

Up to 40 finger simultaneous draw

Flicks to move, Pinch to zoom, Multi-finger rotation
