

Palas Self Service System with payment acceptance for EV charging stations (AC 3.3Kw)

Palas Self Service Systems (PSSS) have:

- Large touchscreen displays, informative, easy-to-use; show attractive advertisements while charging
- Integrated payment acceptance system—debit/credit cards, e-wallets
- 16A sockets, energised for specified duration only on successful payments. Optional - for specified power consumption
- Embedded Win 10 (IoT) for easy integration with advertisements and other applications
- Energy meter
- Reports— daily/monthly usage data & analytics.
- Remote health management
- QR scanner - scan a movie ticket or store bill and get free charging
- Optional : systems for AC Fast (normally AC Slow is recommended, as most vehicles charge up to 80% within 2 hours)

Ideal for

- EV Charging Stations in Parking Garages in Malls, Office/Residential buildings;
- Commodity dispensers

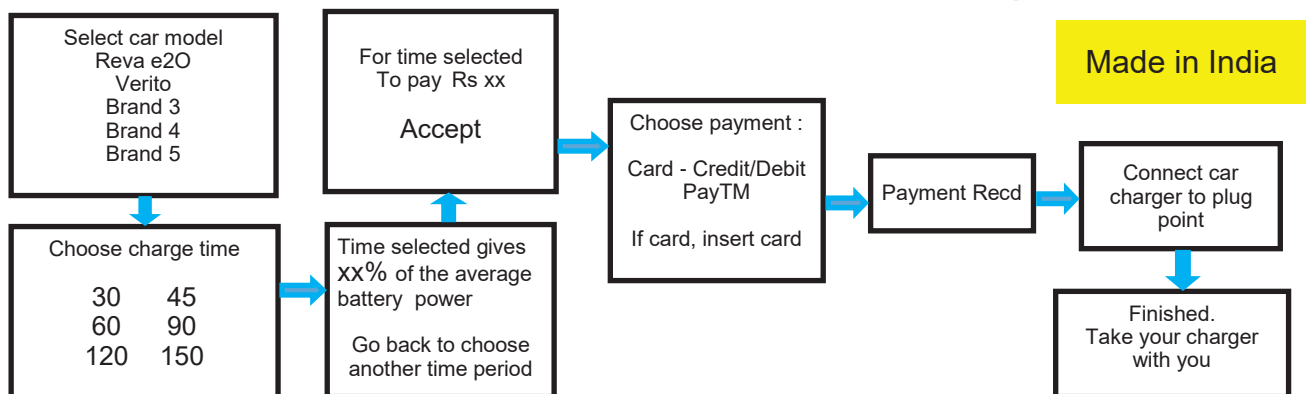

EV CHARGING STATIONS

- Touch the large touchscreen to choose the time-duration for charging—eg 30 / 45 / 60 /90 /120 minutes
- Estimates are displayed on the large touchscreen, showing, for some popular cars, approximate percentage of battery charging that can be done in the chosen minutes
- The amount for the duration selected is shown on the screen, touch to confirm
- Select the payment method—debit/credit card or an e-wallet
- If card, insert card, and enter pin on the secure pinpad
- If e-wallet, enter mobile number, select pay, and enter pin on mobile to complete transaction
- Successful payment energises the 220VAC 16A socket

Included in the system are:

- Touchscreen display— standard 43cm (17"); optional from 10" to 65"
- Payment system - Accepts credit/debit cards, e-wallet.
- 16A sockets for users to connect their own cables
- Embedded Win 10 (IoT) for easy integration with advertisements and other applications or devices
