

Today, when people want to maintain distance from strangers, reducing interaction with restaurant staff will make customers more confident of visiting for dine-in. Old days of waiters, in “fine dining”, hovering around guests will be replaced with more automation

With Palas’s solution,

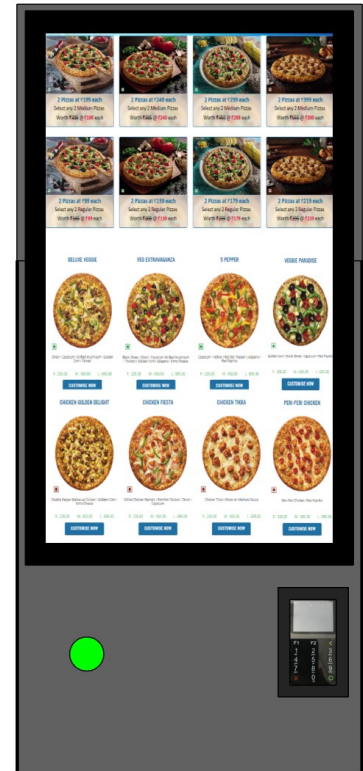

- walk-in customers, for dine-in or take-away, can order (and pay) themselves from either a touchscreen kiosk or their phones.
- After ordering, guests go to their table and wait
- KOT is sent directly to kitchen
- When ready, order brought to table by waiter in “fine dining”, or collected from counter by guests in “quick serve” (QSR) formats
- Saves time, as ordering and payment are combined
- Payments mainly through e-wallets or card, reduces cash handling infection issues
- Hygienic—ordering from own phone has no risk.
- Hygienic—Ordering from kiosk also has no risk as Palas kiosks can be easily sanitised several times a day

Good for fine dining as well as QSR

Minimises interaction with staff, as no need for waiter to make multiple trips to guest tables, giving menu, taking order, bringing order, bringing bill, then returning to collect cash or bringing card machine

For restaurants, both “dine-in” and “take-away”:

- Gives confidence to guests that dining area is “safe”
- Reduces staff, as fewer waiters are needed
- Typically, a Palas touchscreen self ordering system pays for itself within 3-4 months or less

Hardware & Software Made in India

Guests can order either from Kiosk or from their own phone

Wall mount model

Floor mount model

Palas manufactures in India:

- Touchscreen monitors & Computers
- Industrial Touch Panel PCs,
- POS systems
- Smart Card Readers for ATMs, kiosks
- Interactive Digital Signage Systems

Palas is an IIT / IIM alumnus enterprise
