Palas Self Service Systems for OPD Patients
Easy to disinfect and sanitise

PALAS
ISO9001-2015; ISO14001-2015

SELF-SERVICE REGISTRATION OF PATIENTS

- Reduces chances of infection as less patient-to-receptionist / cashier contact

- Dis-infect, as many times a day as needed, with Alcohol based sprays without damaging the system. Sanitizing wipes kept next to the system can be used by patients to clean the screen, if needed

- All metal and glass construction, easy to clean. No plastics. Optional Stainless steel

- Multiple systems, kept 1 mtr apart, reduce queues and reduces patient-to-patient passing of infection

- Easy to use touchscreen based software enables quick patient registration.

- Payment by e-wallet is standard, eg PayTM, Bhim, UPI, etc. Optional credit/debit card payment— safer, as patients themselves insert card, cashier need not touch customer's card

- A4 size print-outs give details like patient name, age, number, amount paid, department / doctor

- Registration data is sent at periodic intervals to reconcile with main hospital records at the back end

- Optional outdoor systems that can be kept outside the building entrance

- Works 24x7, overcoming problems of shortage of trained staff

Made in India

Palas Self Service Systems (sleek, space saving design only 80mm depth) include :
- Capacitive touchscreen monitor
- Intel Celeron processor
- E-wallet payment integrated
- Pre-loaded basic registration software

Prices start at only Rs 99,400
(for wall mount 17" system, without scanner. GST extra at 18%)

Keep on table or mount on wall

Wall Mount

Optional QR scanner or camera

Metal (no plastic) Optional : Stainless Steel

Optional Credit /Debit Card reader

Glass Touchscreen

With Floor Mount without printer

With A4 printer

How it works:

- Using the onscreen keyboard on the PSSS, patients enter basic details like name, age, phone number, doctor /department to be consulted
- Amount they need to pay is displayed on the screen
- Payment is done through e-wallets, following the simple instructions on the screen
- In the paperless system, a receipt and patient token number is sent to the patients phone. In the system with a printer, a receipt-cum-patient docket is printed on A4 paper.
- The patient then goes to the relevant department; the doctor can enter observations / prescription on the same sheet
- Each day, at specific intervals, report of all payments/patients are sent in an XL format, or as a csv file for integration into other hospital management systems
- The PSSS can be sprayed or rubbed with alcohol (IPA) to sanitise it at frequent intervals
