

# Palas Payment Kiosks for Self-Service applications Either Android or Windows

Touch Systems manufactured by Palas are used in a variety of areas - banking, transportation, hospitality, factories, machine control, robotics, gaming, smart cities, and many more.

Palas Payment Kiosks offer an optional choice of payment systems including legacy Credit/Debit Card, Cash and the latest Digital Payments using e-wallets, UPI, Bhim, PayTM, RuPay, Tap-to-pay and more Customers can use their own Card Readers, placing them in the included holder

Palas manufactures its own hardware, with an open architecture based on Windows or Linux or Android. Customers can easily use their own application software on Palas hardware. Palas can customise software for some special applications, designed to make self-service kiosks easier to use

A couple of examples of Palas systems are below; many more models are available
